

Everyone sometimes asks himself:
is there still hope?
There is always hope. You are not alone.
If you have hope, give hope.
When you are hopeless, receive hope.
Do all things you do out of love.
Believe and trust.

Kipepeo Family Foundation

June 2020

Nora Zahir Abebe

"I much thank KIPEPEO for the chicken, that they help me to do an education and enable my mama doing a job with which she earns enough money and can at the same time care for my disable brother.

Thanks for everything they did form e and my family. God bless you! "
Agata

Actual situation in Tansania

As everywhere on earth now, we are concern about the corona virus too. Current there is an actual need of clean disposable gloves, disposable masks for doctors, sanitizers as well as soap in the village dispensarys who we stay closely in contact with. They rely on help, to be able providing the required hygiene-interventions against the virus. For the moment they do, due to financial reasons, not have the possibility to guarantee enough safety.

If you would like to help, please transfer an amount of your choice to the bank account below, with the remark: CORONA. This way we know what the donation is for and we can bring the urgently needed materials to the affected people.

SWIFT/BIC: UBSWCHZH80A

IBAN: CH84 0024 1241 10690401 C

UBS Postkonto: 80-2-2

Verein Kipepeo, Stutzligasse 22, 3855 Schwanden

Already now we feel obliged to do our best. Together with the street children of Pamoja Tunaweza Boys and Girls Club, KIPEPEO has already sewn 1'000 masks. These have been produced in a fair, ecological and reusable way. The young people were paid a fair salary for the production.

The masks got distributed to different risk groups and also to other social institutions which delivered

Additional KIPEPEO provides brief public information's about the corona virus, to sensitize different communities. In the villages we hang information-sheets where is written clear and easy about the symptoms, prevents, risks and dangers of the sickness. Village leaders get educated so that the community members do have more contact person, in case of uncertainty and questions, than just our small team, which would be a bit overwhelmed to carry all that responsibility on them own. ☺

Thankful

Here goes a hughe thank you to all persons who encourage us with their thoughts and/or support financially. As we always say, but the truth is:

Without you all our work and good acts couldnot function at all!

To the members of Kipepeo Society in Switzerland, who are on a voluntary base, anytime willing to help where help is needed.

To all friends and family members of the team. You daily make us strong. You are caring a lot, are always having a listening ear and make us believe in ourselves.

Me, Joy Leader and Founder of KIPEPEO, want to say big thanks too to Simba and Zakayo who are current on site and never give up fighting.

Thank you that you always give your best, that you keep your own needs and fears behind, that you keep on being positive in any hard situation and that you put all your effort, love and power into the indigent.

Corona is not the only problem in this world:

That would be something almost great, if all other problems would disappear due to the actual situation. ☺ Since this is not the case, Kipepeo continues to work as usual with and for the families, in addition to the above mentioned measures. The family members are busy with their daily struggles in lives, but also with the heavy rains that have taken away some of the homes of inhabitants in Moshi region. Following you can read some brief reports from two families we currently cared for:

Amidou

A single uncle who takes care of his brother's son whom's father died. With Kipepeo's help he was able to build a suitable, stable barn for his pigs. This in turn enables him to increase the number of piglets. The pig he already had was admitted and sufficient food and water was provided. At the moment it is important to train him how to do business properly and educate him on how to earn enough money to be able caring for his nephew.

Mama Lia, left

We are working on it to strengthen her ability of producing soap, so that she can feed her family with the profit of the saled soap in future.

Mama Salma with Laila, right

Right now we are getting to know the family better. Through past home visits and conversations we are confident that there will be a solution here as well. Some cases just take longer for personal reasons. This is okay and is allowed to happen. We patiently look forward on their succeed.

New Website

Our website has been completely revised and redesigned. We hope on that way, that we can provide more clear information and that you will get a better insight into our daily work. There are many stories, projects and also funny experiences as well as personal experiences to read. Why don't you take a look on: www.kipepeo-kiwavi.com

Hostel

Actual, due to the well known reasons of corona, we can not accomodate tourists at Kiwavi Home. Please contact us for further informations if you want to know About the current situations of travelling to tanzania. We hope to see you again soon and to start soon well, happy and healthy again. Take care all of you!
